

THANKS TO THE PARTICIPANTS

in the

First International Workshop to Explore Synergies between
Nuclear and Renewable Energy Sources

Pete Lyons, Workshop Chairman

Golden Colorado

June 9-10, 2016

DAY ONE

A wide range of international perspectives presented.

**More and stronger international progress and studies
than I realized.**

Excellent discussion

And a wonderful dinner last night.

RANGE OF APPLICATIONS DISCUSSED

Hydrogen production and its role in biofuels

Coal-to-Liquids and refinery applications

Desalination

Importance of the cement and paper industries.

BREAKOUT SESSIONS

- Reduced to two due to time limitations
 - How can international cooperation strengthen understanding of:
 - Issues associated with RD&D of technologies.
 - Issues related to modeling and simulation.
- A question in my mind
 - If the “second” product is more profitable than electricity, how can the electricity be valued so as to maintain support for the grid?
 - Feed-in Tarifs
 - Capacity payments?
 - Carbon taxes?

IN RECOGNITION

NREL

Debbie Meixner
Catherine Burke

INL

Dena Tomchak

AND THE SPONSORS

NREL and INL
JISEA and CAES
